 YAMAHA
ARIUS
DIGITAL PIANOS
YDP-160/140

Yamaha raises the bar again—with the newest name in Yamaha digital pianos

**Authentic sound, natural touch and an absolute joy to play
—both in practice and performance—in an advanced, yet affordable console digital piano.**

Exceptionally natural key touch virtually replicates that of an actual grand piano
—with premium Graded Hammer Effect keyboard of the *ARIUS* YDP-160
and Graded Hammer Standard keyboard with matte black keytops found on the *ARIUS* YDP-140.

Built-in AWM stereo sampled instrument voices faithfully reproduce their complete range
—from the soft, dark lows to the glistening, bright highs.

The damper pedal includes an authentic Half Damper effect, giving you nuanced expressive control
over the sustained sound... far more realistic than a simple on/off footswitch.

Built-in song recorder and metronome make the instruments ideal
for piano lessons, practicing, or even as a scratch-pad for you next masterpiece.

50 specially selected piano songs of standard piano repertoire are built into each *ARIUS*,
either for your listening enjoyment, or as a rehearsal tool while playing out of the included “50 greats for the Piano” book.

True piano feel and expressive control

Drawing on over a hundred years of experience and craftsmanship in making world class acoustic pianos, Yamaha introduces the *ARIUS* series. Both of these instruments provide exceptionally natural, grand piano-like touch, with realistic weight gradations—heavy in the lower end, and light in the upper. The YDP-140 has the entry-level Graded Hammer Standard keyboard with realistic matte black finish key tops. The premium Graded Hammer Effect action of the YDP-160 provides even greater expressive control, including repeated playing of the same note with perfect articulation. So Graded Hammer Effect keyboard suits skill levels from Chopsticks to Chopin Etudes and everything in between.

AWM Dynamic Stereo Sampling for authentic piano sound

The *ARIUS* series digital pianos feature Yamaha's sophisticated AWM (Advanced Wave Memory) with Dynamic Stereo Sampling for the ultimate in instrument realism. Taken at different 3 levels of soft, medium and loud each key is comprised of multiple stereo recordings of an actual grand piano. This provides subtle differences in volume and timbre depending on how you play the keys, and gives you full expressive control over the sound.
